Career Objective

Seeking a challenging Developer position, where I can contribute my education knowledge and experience to the growth of the organization and my technical skills

Technical Competencies

- **Databases:** Oracle, PostgreSQL, MySQL, MongoDB
- **Programming Languages:** C, C++, C#, JavaScript, PHP, XML
- **Web Development:** HTML5, CSS3, Bootstrap 5, React + React Hooks, Redux, jQuery, JSON, Node.js, Express.js, NPM, RESTful API Design, SQL
- **Operating Systems:** Windows
- **Tools:** MS Office, Dev C++, Visual Studio, Sublime Text, Atom, MS Visual Code, GitHub, SVN, Eclipse, Heroku, Netlify

Education and Certificates

Computer Programmer Diploma (CPD), Seneca College, Toronto, Canada (September,2017-April,2019)

Bachelor of Computer Engineering, Eastern Mediterranean University, Famagusta, Northern Cyprus of Turkish Republic (September,2013 - July,2016)

Certificates

SMILE Certificate of Achievement (April,2019)

ABET (Accreditation Board for Engineering and Technology) (June,2016)

Volunteering

Seneca College, Toronto, Canada

SMILE MENTOR, (September,2018 – April,2019)

- Taught students the fundamental logic of programming
- Helped students learn to program in an easy and fun way
- Helped students deal with issues in Academic areas
- Prepared and submitted monthly report about each student

Academic Projects

Smart Brain Web Application

- I have created a complex image recognition app using HTML5, CSS3, Bootstrap 5, JavaScript, React + React Hooks, Node.js, Express.js, NPM, RESTful API Design, SQL and PostgreSQL. The application allows users to register, sign in and upload any image and detect face if exists. The application uses

Continued...

AI (Artificial Intelligence) Clarifai API to detect a face on the uploaded image. In addition, users can update their information on the profile page. Furthermore, there is an administrator who has complete control of the application. The administrator, can monitor the activities of every user, delete, create, and update information about any user in the system.

Expense Tracker

- Using HTML5, CSS3, JavaScript, React + React Hooks, Node.js, Express.js, and MongoDB, I created expense tracker web application where user can add expenses which have name and cost, remove expenses, view remaining budget, view how much they've spent, edit budget and search expenses.
